

FINALCAD

Change the way we build.

Up to **50%**
redundant checks
saved

Up to **2hrs**
per day of re-keying
data saved

Up to **25%**
improved
performance

FINALCAD provides mobile applications and predictive analytics for Infrastructure Works: roads, rail and civil engineering. With FINALCAD, you can deliver works that meet your quality requirements without any delays or repetitions. You can “do it right first time”. Your project progress is tracked in real time and any deviations are foreseen thanks to the coordination between teams sharing information continuously.

MOBILE & ON THE FIELD

FINALCAD is right for every trade and has been designed for use anywhere - with or without internet connection. The apps are available on tablets and smartphones for all platforms (Android, iOS and Windows).

SECURE

Its unique, device-based authentication system and encrypted data make the FINALCAD app the most secure in its category and ideal for compiling a record of works.

SMART

FINALCAD helps site managers and maintenance operators anticipate deviations and select the right actions. Management has access to dashboards which help in the decision making process.

USER-FRIENDLY

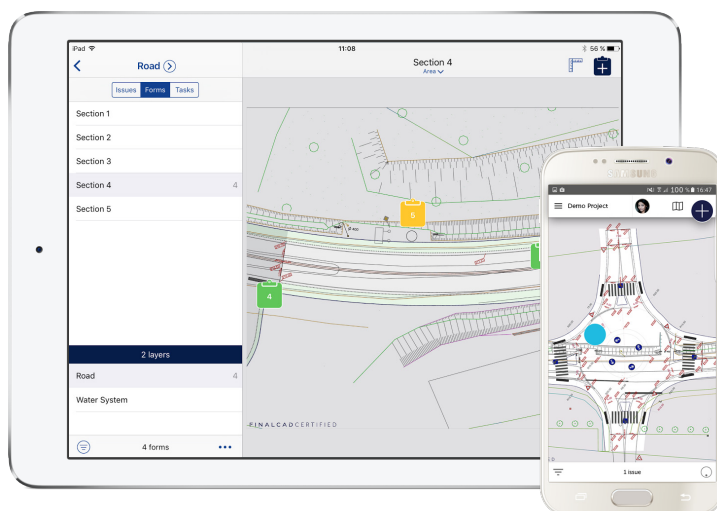

Every FINALCAD feature has been designed to be simple, intuitive and easy to learn in only 5 minutes. We make technology work for users, not the other way around.

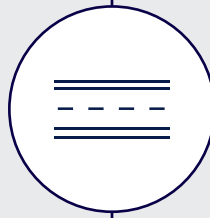

ACCESSIBLE TO ALL

Once you use FINALCAD, everyone involved in your project can be associated after downloading the app to the mobile platform of their choice.

OPEN

FINALCAD integrates with your existing third party systems: ERP, drawings and document management, project management software and external auditors. Use BIM on the field with continuous digital blueprint updates.

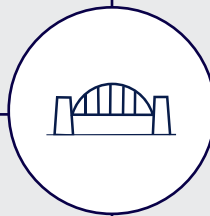

ROAD WORKS

Continuously share information with operational staff

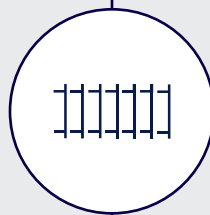

- Daily work tracker
- Clocking teams
- Checking consumption of materials
- Managing hold-ups
- Quality checklists
- Consolidating feedback
- Circulating feedback
- BIM compatible

CIVIL ENGINEERING

Provide real time progress tracking

- Managing concrete delivery slips
- Checks on iron reinforcements, tie plates, etc.
- Progress/execution monitoring
- Photo reports
- Work execution checklists
- Consolidating/circulating feedback
- BIM-field interface

RAIL

Improve performance tracking and management

- Rail scheduling
- Inspections in the presence of all parties
- Signal checklists
- Defect tracking
- Creating a record of works
- BIM compatible

FINALCAD integrates with your information feeds

No more wasting time going from app to app. You can access all the information you need to manage your project: project numbers and names, BIM, company directory, drawings and document management software, quality checklists, schedules, etc.

Focus on your job!

I am getting up to 100 calls from my site managers every day. With an app we can use to send information and photos quickly, we save several hours a day.
